SUMMARY

Software Engineering student building Android apps with Java, XML and Firebase, and responsive websites with HTML, CSS and JavaScript. Built an AI-powered study app, along with a live portfolio website. Seeking a Software Engineering or Mobile Development internship to contribute to real product work.

EDUCATION

University of Management and Technology (UMT), Lahore <i>BS Software Engineering Relevant: OOP, Data Structures, Databases</i>	2024 – 2028
Punjab Group of Colleges <i>Intermediate (Pre-Medical)</i>	2022 – 2024
Beacon House School <i>Matric 9th (505/505) 10th (978/1100)</i>	2020 – 2022

TECHNICAL SKILLS

Languages: Java, C++, SQL, XML, HTML, JavaScript.

Mobile & Backend: Android Studio, Firebase (Auth, Firestore), Volley, REST APIs

Tools: Git/GitHub, Figma, Jira, Trello, Draw.io, Canva

Concepts: Object-Oriented Programming, UI/UX Design, Agile basics.

PROJECTS

AI Study Helper – Android App Java, XML, Firebase, Volley

GitHub: https://github.com/maham-naeem8/Study_Nest_App

- Built a study app with login/signup, dashboard, quiz timer and notes screens.
- Stored notes and quiz progress in Firebase Firestore, secured access with Firebase Authentication.
- Integrated a third-party chatbot API using Volley to answer study questions in-app.
- Designed the app's screens before implementing them in Android Studio.

UI/UX Designs Canva, Figma

GitHub: <https://github.com/maham-naeem8/contact-app-design>

- Designed prototypes for 'contacts app' and also designed screens for 'AI study helper app'.

Portfolio Website HTML, CSS, JavaScript

GitHub: maham-naeem8.github.io

- Designed and deployed a responsive portfolio website on GitHub Pages.

LEADERSHIP & ACTIVITIES

• Led a team of 3 across academic software engineering projects, coordinating UI/UX design, presentations and implementation.
